

# KY72-1

## Specifications:

High quality robot servo with advanced interior design and precision potentiometers.

Pull and Plug connections and servo wire works better for robot.

Dual-ball Servo which means one is Driving shaft and another is virtual axis (supporting function).

High torque and 270 degree rotation, barely absent and dead zone.

## Specification:

Weight: 60g

Size: 40\*20\*40.5 mm

Speed: 0.16 sec/60° 7.4V

Locked-Rotor Torsion : 15Kg.cm 6.6V; 17Kg.cm 7.4V

Voltage: 6-7.4V

Unload Current: 100mA

Line Length: 30cm
